**Subject:** R6 Public data dissemination

On the multi-regional call yesterday a the topic of data posting was discussed and R8 stated that all data would be disseminated through the R8 EPAOSC Gold King website. There were no objections to this plan on the call. The public viewer will be hosted through that site so it makes sense to post the summary reports there. This process also allows for the regions to control when their data is posted.

On yesterday's call we acknowledged that the decision on where the data would be posted could very well change based on influences from the JIC.

R6 will not have validated data until COB tomorrow so the earliest we can post data for public dissemination is sometime Tuesday depending on how long it takes the EU to review the data.
